

INNOVATION in HEALTHCARE and Medical Technologies

OVERVIEW

The landscape for innovation in healthcare and medical technologies has never been more dynamic.

The NHS and international health centres, together with the public, private, scientific and academic sectors, are all demonstrating their absolute commitment to innovation.

Internationally, cross-government commitment to increase the uptake on innovative medicines and technologies is accelerating engagement between industry and health-service providers as is demonstrated in the UK with the NHS.

Benefits of investing in Innovation in Healthcare and Medical Technologies 2011

1. Communicate directly with key buyers and decision-makers
2. The only specialised business report that will cover academia, research & enterprise
3. Further circulation advantages from parent report *Innovation UK* (in association with UKTI) & its website
4. Search term "Innovation UK" is No1 on Google from over 50 million search results
5. Established report enjoys an international profile & readership of senior decision makers responsible for R&D and innovation
6. Invitation only ensures that only the editorially relevant profiles/advertisements are selected

What you should promote

1. Showcase projects currently in place with the NHS
2. Showcase new innovations
3. Highlight cost efficiencies and delivery

Confirmed and suggested features – these are some examples:

The NHS Life Sciences Innovation Delivery Board

The role of the SHAs – Faster Innovation and sharing of best practice

The NHS Institute for Innovation & Improvement
